MATLAB Installation Instructions

School issued Windows machines should already have it installed. Alternatively you can download it (or get the latest version) by mapping a network drive (when on the campus network) to \\storage01\public and downloading it there.

Here are some instructions for mapping a network drive:

- <http://windows.microsoft.com/en-us/windows/create-shortcut-map-network-drive#1TC=windows-7>

Here are instructions on installing MATLAB

- <http://www.stevens.edu/itwiki/w/index.php/Matlab>

You will first be asked to make a Mathworks account. Use your Stevens email address.

When installing MATLAB (and sometimes when running it for the first time) you may need the Activation Code. The code is:

- Activation Key: 54703-98224-69173-57729-64687

Also during installation just leave all of the default settings (including user name).
