

# CS-105 Assignment 11

## Part I

For me, the hardest part of this assignment was getting the file to print correctly. I had trouble with the `fopen` function and the `fprintf` function.

## Part II

For this part, I had trouble with determining how to convert the data from the file to a matrix.

## Part III

For me, part 3 was the easiest. I just needed to create a function with `if/elseif/else` statements.
